Community Provider Report Form for Students Seeking Re-entry

INSTRUCTIONS FOR THE COMMUNITY PROVIDER

The patient who is requesting documentation from you at this time is a former student who is seeking readmission to Stony Brook University following a leave of absence. The University requires documentation from a community treatment provider when a student has been required to have a mandated assessment as a result of disruptive and/or concerning behavior, and the student has withdrawn or has been withdrawn from the University during the assessment process. The documentation is intended to address the nature and extent of the patient's current condition as it relates to the health condition that precipitated the behavior that led to the student's withdrawal. The College will weigh your opinion when assessing the patient's ability to function safely and autonomously in this environment and adhere to the University's Conduct Code. Following the receipt and evaluation of documents provided by the outside treatment provider, the student will be scheduled for a mandated assessment. At this time, we may seek phone consultation with you as well.

If you or the patient believe that he/she is entitled to accommodations and wishes to document a disability, please contact Disability Support Services at 631-632-6748; http://studentaffairs.stonybrook.edu/dss/
Please provide, to the best of your ability, the following information with regard to the patient who is requesting documentation:

Provider/Clinician's Name:	Student's Name:
